Technical Toolbox

Languages & Frameworks:

JavaScript (ES6+), TypeScript, React.js, Next.js (App Router)

State & Backend: Redux Toolkit, Zustand, Node.js, Prisma, Supabase, MongoDB, Postgresql, Better-Auth

Styling & UI: Tailwind CSS 4, Shadcn UI, Material UI & Responsive Design

AI & Emerging Tech: Prompt Engineering, Vibe Coding, Google Gemini AI, Vercel AI SDK

Tools: Git, GitHub, Vercel, VPS, Coolify, Trello

Education & Certifications

BA in English

Govt Titumir College, DU (2019 - 2022)

Next Level Web Development

Programming Hero (Issued: April, 2024)

Complete Web Development with Jhankar Mahbub

Programming Hero (Issued: June, 2022)

Language Proficiency

Bangla (Native), English (Intermediate)

Reference

Omar Bin Kabir,

Cheif Operating Officer, SEOVOLTZ

Email: Hello@omarbinkabir.com

Experience

Software Developer

SEOVOLTZ, Maizdee Court, Noakhali | Full Time (May 2024 - Present)

- Architecting high-performance Internal and SaaS applications from the ground up using Next.js and modular component design.
- Significantly improved Core Web Vitals and client-side performance, ensuring landing pages and tools remain instant under high traffic.
- Collaborating on the entire development lifecycle, from initial logic mapping to the deployment of production-ready web applications.

Frontend Developer

Moynaa, Remote | Intern (October 2023 - March 2024)

- Developed accessible frontend interfaces for a health-tech platform, focusing on ease of use for both patients and providers.
- Participated in regular sprints to rapidly iterate on features and UI enhancements in a fast-paced environment.
- Implemented mobile-first responsiveness and cross-browser compatibility, expanding the platform's reach across diverse devices.

Key Projects

Hirelens AI

[Live Link](#)

[Source Code](#)

AI-Powered Recruitment Platform built with Next.js, Tailwind CSS 4, TypeScript, Supabase, Vercel AI SDK, Gemini 3 Flash, Clerk Auth

- AI Integration:** Developed a system using Gemini AI to automatically analyze and rank resumes against job descriptions with match summaries.
- Bulk Processing:** Built a client-side PDF extraction engine allowing recruiters to upload up to 10 resumes simultaneously.
- Modern UI:** Engineered a premium dashboard with real-time notifications and an intuitive candidate pipeline management system.

ShipNext

[Source Code](#)

A Collaborative Product's feature prioritization tool built with Next.js, Tailwind CSS, TypeScript, Prisma, Postgresql, Better-Auth

- Interactive Public Boards:** Launched community boards for seamless feature requests and upvoting, fostering immediate user-founder transparency.
- Centralized Founder Dashboard:** Built a centralized hub to manage and track feature statuses for streamlined execution.
- Data-Driven Insights:** Developed a lightweight analytics engine that identifies top user pain points and delivers weekly summaries of community trends.
