

Arfin Noor Rahman

Full-Stack Developer · AI Integration

Dhaka, Bangladesh · arfinnoorrahman12@gmail.com · +880 1739 673620 · [GitHub](#) · [Portfolio](#) · [LinkedIn](#)

Full-Stack Developer with 2+ years of experience building end-to-end web applications using Next.js, TypeScript, Python, FastAPI, and AI integrations. Shipped two SaaS products from zero to production, with a strong track record across both frontend and backend systems.

EXPERIENCE

Product Developer · **Growbiz Lab** · Contractual, Remote

May 2026 – Present

- Architecting and shipping SaaS and AI-powered applications using Next.js, TypeScript, Python, and FastAPI for building scalable APIs and full-stack systems from concept to deployment.
- Designed and integrated LLM-powered workflows, AI agents, and automation systems that streamline business operations across internal and client-facing products.
- Collaborating directly with founders and stakeholders to translate product requirements into technical specifications, prototypes, and production-ready features.

Software Developer · **SEOVoltz** · Full-time, On-site

May 2024 – Apr 2026

- Architected and shipped SaaS and internal web apps using Next.js App Router and TypeScript; cut average time-to-launch ~30% through reusable component systems.
- Improved Core Web Vitals across 3 client products — Lighthouse scores from ~60 to 90+ and page loads from ~4s to under 1.5s by leveraging the right mix of CSR, SSR, and ISR strategies.
- Introduced Tailwind CSS 4 + Shadcn UI as the team's design system, reducing per-feature UI dev time ~40% across a 4-person team.

Frontend Developer · **Moynaa** · Internship, Remote

Oct 2023 – Mar 2024

- Built WCAG-compliant UI components for a health-tech platform; improved task completion rates ~25% in user testing and delivered mobile-first interfaces across 5+ features in 6 months.
- Reduced frontend bug backlog ~35% through methodical code review and component refactoring in the final sprint cycle.
- Collaborated with a remote cross-functional team for consistently delivering features on schedule within a structured sprint cadence.

SKILLS

Frontend	JavaScript (ES6+), TypeScript, React.js, Next.js, Astro.js, Tailwind CSS, Shadcn UI, Redux Toolkit, Zustand
Backend & DB	Node.js, Express.js, Prisma, PostgreSQL, MongoDB, Python, FastAPI, Supabase, Better Auth, Clerk, JWT Auth
AI & Integrations	Vercel AI SDK, Langchain, AI Agents, N8N, Automa, Workflow Automation, AI-Assisted Coding
DevOps & Tools	Git, GitHub, Docker, Vercel, AWS, VPS, Coolify, Dokploy
Soft Skills	PRD & Technical Requirements Analysis, Product/Feature Discovery, Cross-Functional Collaboration, Agile-based Development

KEY PROJECTS

Spark CRM, An open-source lightweight CRM for creative agencies to manage clients, projects, and proposals without enterprise complexity.

Next.js · TypeScript · Tailwind CSS 4 · Shadcn UI · FastAPI · PostgreSQL (NeonDB) · Gloq AI · JWT Auth

[Live](#) · [Source](#)

- Integrated Groq's inference engine to power intelligent email and proposal generation, leveraging FastAPI for real-time output—enabling agencies to automate client communication workflows while reducing composition effort by ~65%.
- Architected a performant project pipeline interface using @dnd-kit for gesture-based drag interactions, React Query for state synchronization, and Server Actions for zero-latency status updates across the UI without full-page refreshes.
- Implemented a recruiter-focused client dashboard with computed health metrics, multi-attribute filtering (status, industry, engagement recency), activity auditing, and JWT Auth for accessing control across a multi-tenant data model.

CERTIFICATIONS

Next Level Web Development & Complete Web Development · Programming Hero (2022, 2024)
